

Insurance and Documentation

Staff Qualification Certificates and First Aid Certificates

We will send you our staff qualification certificates, and our first aid certificates upon request.

Method Statements

After the site visit is completed, a 'method statement' will be written which outlines details of the entire event, pre-rigging, rigging of abseil, event day, de-rigging. Staff roles are assigned and agreed, as well as methods of communication.

Risk Assessments

The Generic Risk assessment is available before the site visit. After the site visit the generic risk assessment will be replaced by the specific event risk assessment. This is then made available to you.

Participant Information Forms

A separate completed form will be requested from each participant - capturing information such as medical details and emergency contact details. A separate form will be completed for each supervised person under 18 years old. These could be completed on the day of the event.

Insurance Certificates

We have full event insurance cover - and this documentation can be issued at the point of booking, or before upon request.

Photos

Photos that we take during the Abseil Event will be given to you free of charge after the event, and they will be uploaded to social media very shortly afterwards.
